

Global standards

Glass Wall Systems has been revolutionising the facade industry

At Glass Wall Systems, we are in the business of transforming mundane structures into architectural masterpieces with our turkey facade solutions. Built on a robust foundation of quality, reliability and integrity, our award-winning work has been recopied for path-breaking ovations. Our drive has been powered by integrated ISO-certified design and manufacturing facilities in India. With more than 30 years of experience in the industry. We bring together precision engineering and fine aesthetics to reimagine façade and redefine skylines.

Since its inception in 2001, Glass Wall Systems has transformed how architectural facades have been fabricated in India. As the country's pioneering facade engineers & executors, the expert team, led by dynamic designers and architects, has redefined the country's skyline. Over the last two decades, the team has grown exponentially and comprises more than 1000 multi-skilled people. An ISO-certified company and member of the Council on Tall Buildings and Urban Habitat, Glass Wall Systems' expertise has been recognised across diverse projects including India's tallest residential and commercial towers Eastern India's first green-rated building India's largest window project, and the country's first media façade building.

At Glass Wall Systems, we live on the cutting edge of design and manufacturing technology. Having a team of 30+ desigers led by 11 team leads we make use of production software OrgadataTM for fabrication and to minimize errors, while software like AutoCADTM, Ansys", STAADTM and RevitTM are used to optimize designs. Advanced 3D design software enables our designers to achieve the most complex and dynamic façade designs with ease. Once designs are finalized, the geometry of the structure is manufactured at our in-house facility which meets the most stringent quality standards. Our consolidated processes and improved logistics are key to ensuring that our façade solutions

are delivered without any hassles. Dedicated areas for glass pasting, aluminium stacking, assembly and dispatch and packing along with in-house powder coating and sheet fabrication units make us one of the few self sufficient end-to-end production facilities. There are four dedicated production lines for unitized systems, doors, and windows for high efficient. High levels of automation have also reduced the need for manual handling so that glass panels are delivered in pristine condition With an in-house team of over 200 skilled people and a subcontracting strength of over 2000, we are the largest and the best equipped to complete large projects on time and within budget.

500,000+ square feet
Manufacturing area

13,000 square feet
200 Panels production capacity per day

20 million square feet
Facade work completed

04
Dedicated production lines for unitized systems.
doors and windows

500+
Factory strength of well-trained personnel

2000 mm x 8000 mm
Glass panels handling capacity

FABRICATION FACILITY OVERVIEW

- Designed according to Global Standards
- Designed Production Capacity of 180 panels per day
- Designated Export Facility- Green Channel at Customs
- ERP- SAP enabled Shop floor
- Easy access documentation- QR Code and Barcoding system
- High level of Automation with Minimal Manual Handling
- Vertically integrated production with In-House Coating and Sheet Metal fabrication units designed as per global standards
- Manufacturing lines complete with latest modern machines from Elumatec (Germany) , Graco (USA) , LGF Sysmac (Italy)
- Certifications- ISO 9001-2015 Certified
ISO 14001: 2015 Certified
Dow Quality Bond Member
